

Kiranjeet Kour

AI / ML ENGINEER · FULL-STACK DEVELOPER

2.5+ years engineering production-grade AI systems serving 5,000+ users. Specialized in machine learning model integration, predictive pipelines, and intelligent full-stack applications — from data ingestion through scalable deployment.

WORK EXPERIENCE

Software Engineer

Training & Placement Cell · GNDEC, Ludhiana

Nov 2025 — Present

- Architected and deployed a scalable placement platform serving 5,000+ students with automated eligibility filtering, drive scheduling, and real-time results processing.
- Designed RESTful APIs with role-based access control for coordinators and optimised MongoDB queries for sub-200ms response times under concurrent institutional load.
- Built student-facing dashboards for drive registration, eligibility tracking, and official announcements, improving communication transparency across the campus.

Software Engineer

Mohey Innovations

Nov 2024 — Aug 2025

- Owned end-to-end feature development across web and mobile products in a fast-paced startup; built frontend interfaces, backend APIs, and integrated ML inference pipelines into production workflows.
- Collaborated cross-functionally to ship performance-optimised, maintainable code aligned with business goals and tight release timelines.

Software Engineer

RD Group of Industries

Jul 2024 — Sep 2024

- Delivered full-stack features and internal data management tooling under tight deadlines, streamlining operational workflows across business units.
- Strengthened engineering practices in CI/CD workflows, database optimisation, and cross-team technical communication.

Junior Software Engineer

Voltsec.io

Apr 2024 — Jul 2024

- Contributed to backend services and participated in code reviews, testing, and agile sprint workflows on real-world production projects.
- Built a strong foundation in professional software engineering practices, REST API design, and collaborative delivery within an experienced engineering team.

KEY PROJECTS

TyperHouse 0.2 — ML-Powered Typing Platform

typerhouse.tech ↗

Trained a Scikit-learn classification model on keystroke dynamics data to predict the next 5 likely typing mistakes in real time and surface personalised improvement tips. Integrated the ML inference pipeline into a Next.js web app with containerised Docker deployment, an immersive 3D interface built with React Three Fiber, and a live multiplayer typing mode with smart analytics.

PYTHON

SCIKIT-LEARN

ML PIPELINE

NEXT.JS

MONGODB

DOCKER

SOCKET.IO

Training & Placement Platform

tnpngdec.com ↗

Centralised institutional platform serving 5,000+ students with automated eligibility filtering, recruitment drive scheduling, result publishing, and secure role-based access for TNP coordinators. Ensures accurate, real-time communication between the placement cell and the entire student body.

REACT

NODE.JS

MONGODB

REST APIS

InfoCascade — Institutional Notice Board

infocascade.onrender.com ↗

Real-time campus communication platform delivering exam, result, fee, and event updates to 800+ active daily users. Built on an event-driven architecture with optimised database queries to guarantee timely, reliable information delivery at scale.

NEXT.JS

MONGODB

TAILWIND CSS
